SUMMARY

I build clean, fast, responsive websites with JavaScript — and I learn fast on real work. I am an entry-level web developer working in HTML, CSS, modern JavaScript and React basics. I turn designs and ideas into working, mobile-friendly pages, keep every practice build public on GitHub as I learn, and I am looking for a junior role where I can write real code, take feedback well and grow with a team.

WHAT I CAN DO FOR YOU

FRONTEND BASICS

- Responsive, mobile-first pages with HTML5, CSS3 and JavaScript (ES6+)
- Flexbox & grid layouts, clean and semantic markup
- Accessible pages that work on real devices, not just the demo screen

REACT & COMPONENTS

- React components with props and state
- Simple single-page applications with client-side navigation
- Fetching and rendering REST API data in the UI

BACKEND & DATA BASICS

- Small Node.js serverless endpoints
- Consuming APIs with fetch and JSON
- Form handling and basic input validation

TOOLS & WORKFLOW

- Git & GitHub — every build published publicly as I learn
- npm & Vite tooling, debugging with browser DevTools
- WordPress edits and basic SEO practice

TECHNICAL SKILLS

JavaScript (ES6+) · HTML5 · CSS3 · React · TypeScript basics · Node.js basics · REST APIs · fetch & JSON

Git & GitHub · npm & Vite · Responsive Design · DevTools · WordPress · SEO basics · Content Writing

HOW I WORK

Read the requirement carefully → **Plan** small and clearly → **Build** in verifiable steps → **Test** on real devices → **Deliver** with notes → **Improve** with feedback.

OPEN TO: Junior Developer Roles | Internships | Freelance | Remote or On-site | Web Development | WordPress & Support
